

“Torn Paper Animation” Documentation

Thank you for purchasing this add-on. If you have any questions that are beyond the scope of this help file, please feel free to email via my user page contact form [Here](#) . Thanks so much!

A) Overview:

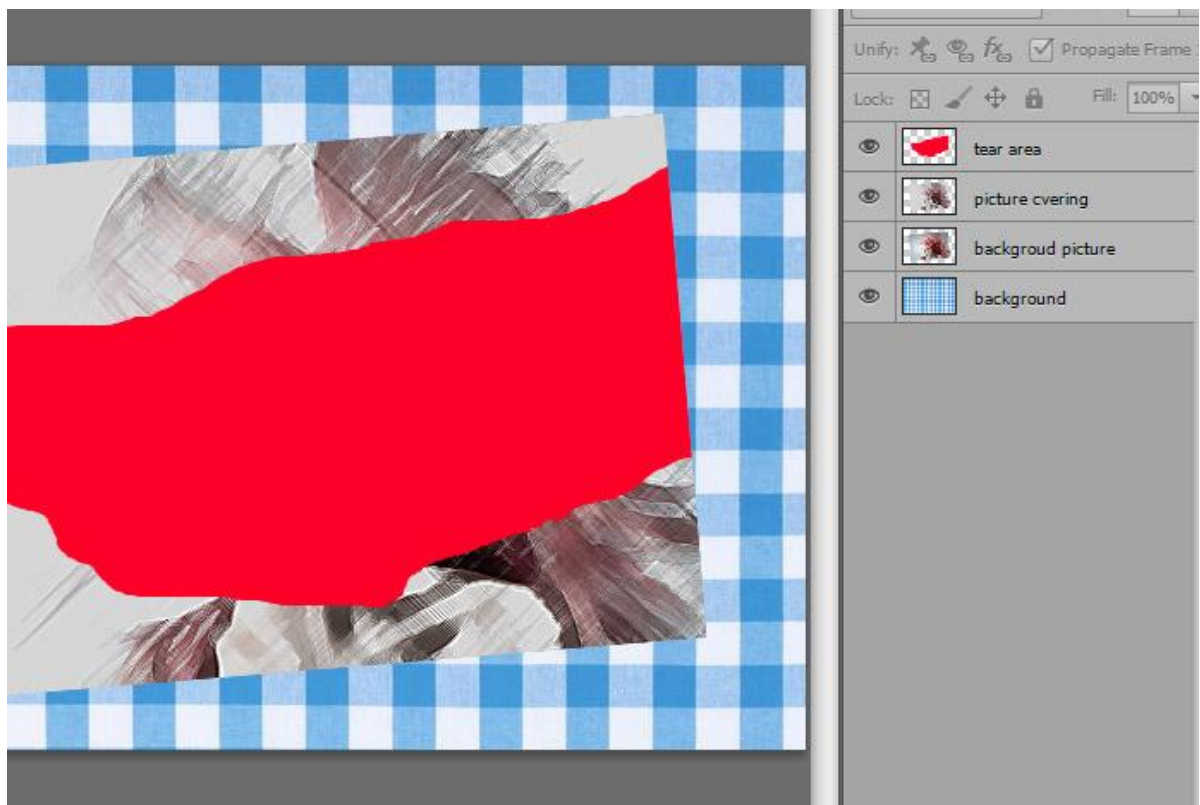

This is a Photoshop JavaScript, can be used in either Windows or Mac OS. With this add-on, you can create an animated or static torn paper effect for your photo.

B) Install:

This add-on is a script, so no need to install, unzip the package to anywhere.

C) How to use:

1. Prepare an image file with Photoshop. This PSD file contains at least two layers, the top layer is the filled or painted tear area, the second layer is the picture covering layer, and the rest of the lower layers are background.

2. Run " Torn Paper.jsx ": go to menu "File" -> "Scripts" -> "Browse.." -> Locate the file " Torn Paper.jsx ", and then press the "Load" button. Settings Panel will be opened.

Close

- Edit the parameters for your needs, and then click “Animation” or “Static” button. Wait a few minutes, it will be done. You can also press the “Preview” button to preview

As a test, you can open “/sample/sample.psd”, and then run the script.

D) Animation:

Open the Timeline: go to menu '**Window**' > '**Timeline**'.

Play the animation: Go to the timeline and click play or press space on keyboard.

E) Export:

The result could be saved as normal image, animated gif or video.

1. normal image:

Go to menu 'File'>'Save As'.

2. Animated GIF:

Go to menu 'File'>'Save for Web'

3. Video:

Go to menu 'File'>'Export'>'Render Video'
